News From Our Digital Library

The Community of the e-Infrastructure Projects is now complete, with the entry of DEISA2, DORII, EGI_DS, EDGeS, e-NMR, ETSF, EUAsiaGrid, EVALSO, IMPACT, LinkSCEEM, neuGRID, NMDB, PESI and PRACE.

A new collection “**Overseas and Companions**” has been added to the DL, which contains public documents produced by collaborating projects, initiatives, organizations, etc. outside the EU or non EU funded, which established collaborations with the e-Infrastructure projects. New entries in this collection are AuScope (Australian Organisation for a National Earth Science Infrastructure), UbuntuNet (Alliance for Research and

Education Networking in Africa), and the MIXED Project.

A very interesting new thematic collection on “**Digital Preservation**” has been added too. This collection contains documents covering issues like: preservation, curation, provenance, authenticity, etc.. Go through its nearly 150 documents do find out articles, presentations, publications, etc. on these relevant topics.

We finally welcome the following EU projects, not belonging to our Unit, which joined the BELIEF DL Community in these last days: CHALLENGERS, CoreGRID NoE, ERINA and ECSS-3S.
